Packaging

Nares is a cosmetics brand that seeks to promote the connection to the inner self of each woman and for this, it is betting on the delicate, feminine, and personal growth of each individual. Nature is a great example of how people can connect with themselves, and that is why floral designs were chosen for this new packaging. Handmade illustrations that transmit the unique power of nature and how you can include it in your daily life. A collaborative work that combines graphic design and CGI.
